

Digital Lock Set

INTERLOCK™
ASSA ABLOY

ASSA ABLOY, the global leader
in door opening solutions.

ASSA ABLOY has set the standard for affordability and functionality with the new and improved Securcraft Digital Entrance Set, making it the ideal solution for digital keyless entry. This upgraded model now includes the hold-open snib as a standard feature adding convenience for free entry whenever access control is not required.

Features

- Entry by key pad, exit by lever
- Resettable code, recommend use of 4 to 6 digit combinations
- Suits right or left hand doors – inward or outward opening
- Easy to use, no wiring or batteries required
- The standard application is a 60mm backset
- Standard set accommodates an increased range of door thicknesses, now between 34-54mm
- Inside handle provided with snib to hold back latch for greater convenience
- Available in satin chrome
- For use with commercial and domestic wooden doors

Options

- A 70mm backset is also available to order separately as are kits for retrofitting to Key n Knob setups, catering to almost any door application.
