

The Interlock Skylight Operator Electronic is a convenient option for opening and closing roof windows. The easy to use control keypad offers four set opening positions as easy-choice options as well as the ability to open the window to any desired position. The operator can be used with aluminium, steel, timber and uPVC framed skylights or hinged windows (non-pivoting).

Features:

- Suitable for new build or retrofit installation
- The microprocessor-controlled keypad can operate up to four skylight windows fitted with Interlock motor units
- Reinforced polymer opening chain for strength, durability and quiet operation
- Recessed to accept a flyscreen, fitted between the operator and the skylight
- New Zealand made

Options:

- An electric rain sensor can be fitted to automatically close an open window when rain is detected
- The chain may be colour matched to the base unit and interior decor

Note: The maximum weight capacity for a restricted chain is 44kg and 22kg for an unrestricted chain
